

AMENDMENT IN RESPONSE TO RESTRICTION REQUIREMENT (or NON-FINAL OFFICE ACTION for future responses)

MS Amendment
Patent Examination Department
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Dear Sir:

In response to the Office Action of Restriction Requirement issued on 2006-11-20 and mailed on 2006-12-04 for US patent application 10/709920 which is invented by Chengpu Wang and which claims the benefit of the provisional patent application 60/320250, please amend the above identified U.S. patent application as follows:

- 1) Cancel original claims 1-7, in response to the Restriction Requirement.
- 2) Replace original claims 8-137 with new claims 1-71 presented in Claims section on pages 2-29 of this Response to Restriction Requirement.
- 3) Cancel original claims 138-169 from this application, in response to the Restriction Requirement. The inventor may later present them in related patent application(s) claiming the same benefit of the original patent application.

To help the examination process:

- 1) A Claim Structure section is presented on pages 30-33 of this letter. However, since this Claim Structure uses jargons to over-simplify the presented claims, it should not be treated as an official part of the application.
- 2) A paper draft is attached with this letter, to help understanding the Specification of this patent application by presenting a simplified version of the Specification.

Thank you very much.
Regards,

Chengpu Wang
